What happened?

Ritika, a young dynamic girl, who went to Slovenia for higher studies, unfortunately, came down with fever and headaches within few days of joining the university. No amount of medication improved her condition and she was advised to get admitted to the University Medical Centre in Ljubljana, Slovenia where she was diagnosed with meningitis.

How did we help?

All it took was a call from Ritika's mother, who was back home in India, to a toll-free number for the travel assistance experts to take control of the entire situation in Slovenia instantly. Ritika's health condition was monitored continuously with regular communication between the doctor

in-charge, her family and assistance expert.
